

# Environmental Policy Statement

As a responsible manufacturer DT Industries Ltd. acknowledges its duty to positively engage with communities and enhance the environment within which we operate.

DT Industries Ltd. is committed to managing social and environmental impacts associated with the manufacture and distribution of plastic products in alignment with the government sustainability goal of achieving net-zero greenhouse gas (GHG) emissions by 2050.

DT Industries Ltd. aims to have a positive impact and approach to environmental decision making with future generations in mind. DT Industries Ltd. seeks to go beyond our legal and compliance requirements and to achieve continual improvement to enhance the company's environmental performance.

DT Industries Ltd.'s holistic approach to responsible manufacturing and defines the following objectives:

- Efficient and effective use of all resources including water, raw materials and energy.
- Facilitating the development of a circular economy by discussing with stakeholders the need to establish the viability of all new products and if they can be designed to be fully recyclable or reusable.
- Continually reviewing the life cycle impacts of our products and our packaging.
- Adopting the waste hierarchy of prevent, reduce, reuse, recycle, recover to avoid landfill and incineration (without energy recovery).
- Utilising renewable energy sources where practicable.
- Continually reviewing and implementing best available environmental techniques.
- Including environmental considerations in all investment decisions.
- Increasing our awareness of the environmental and social impacts of our procurement decisions.
- Requiring high environmental standards from our suppliers and contractors.
- Maintaining an environmentally sound transport and distribution policy.
- Manufacturing quality plastic products and providing the necessary information to facilitate use.
- Providing a safe and healthy working environment for all employees, contractors and visitors.
- Cultivating the knowledge and skills of all employees to improving the environmental performance of the company.
- Being a good neighbour by preventing pollution and protecting our environment to avoid causing environmental nuisance.
- Endeavour to not only preserve, but to enhance the biodiversity of all our sites.

The Environmental Policy is complementary to the Company's Energy Policy, Health & Safety Policy and Quality Policy.

It is made available to interested parties via the company website.

This policy will be reviewed annually as part of the management review process and updated as necessary

**The Board of Directors give their full backing to this policy and will support all who endeavour to carry it out.**
